Please read these instructions carefully before connecting, operating, or configuring this product. Please save this manual for future reference.

Safety Precaution

- To prevent damaging this product, avoid heavy pressure, strong vibration, or immersion during transportation, storage, and installation.
- The housing of this product is made of organic materials. Do not expose to any liquid, gas, or solids which may corrode the shell.
- Do not expose the product to rain or moisture.
- To prevent the risk of electric shock, do not open the case. Installation and maintenance should only be carried out by qualified technicians.
- Do not use the product beyond the specified temperature, humidity, or power supply specifications.
- This product does not contain parts that can be maintained or repaired by users.
 Damage caused by dismantling the product without authorization from BZBGEAR is not covered under the warranty policy.
- Installation and use of this product must strictly comply with local electrical safety standards.

Introduction

The BG-4K120CHA is a cutting-edge USB-C 4K120 video capture device with a scaler, HDMI 2.1 loopout, audio, and HDR10 to SDR conversion, designed for professional HDMI video signal capturing. It utilizes a USB 3.1 Type-C Gen 1 (USB 3.0) interface for high-speed transmission. Additionally, the HDMI input and loopout can support up to 4K2K 120Hz, enabling users to connect to a 4K2K 120Hz source and capture Ultra HD (4K2K@30) video. The BG-4K120CHA also captures and displays original uncompressed HDMI video, resulting in more realistic color rendition.

Moreover, the BG-4K120CHA incorporates large volume image buffer technology to effectively avoid video tearing, and the high sampling rate and accuracy ensure images with high sharpness, rich details, and fewer color edges. Furthermore, with HDR10 to SDR conversion, PS5/Xbox Players can enjoy 4K2K@120 HDR games on a 4K TV while recording real-time 4K2K@30/1080P@120 video streams with SDR quality through USB 3.0 simultaneously.

With its advanced features and high-end capabilities, the BG-4K120CHA is an ideal choice for demanding HDMI video capture applications, offering professional-grade performance and versatility.

* PS5 & Xbox Series X also support 1080P120

Features

- HDMI video and audio streams over USB 3.1 Type-C Gen 1
- UVC1.0/1.1/1.5
- Video resolution up to 4K2K@30/1080P@120 (Video stream over USB-C)
- HDMI 2.1 compliant
- HDMI input & output up to 4K2K 120Hz 4:4:4/4:2:2/4:2:0
- HDR 4K2K@60 4:2:0 10 bits/12 bits
- HDCP 2.3 and 1.4 compliant
- Allows any output to view any HDMI source at any time
- Deinterlace & scaling (upscaling supports up to 1080P@120)
- Mic-in mix with HDMI audio
- HDMI audio extraction
- HDR10 to SDR conversion***
- Play 4K@120 HDR on HDMI out while streaming 4K2K@30/1080P@120 with SDR colors for gameplay capture.
- Volume control knob to adjust the MIC/Headphone volume.
- Auto-detection on video format to ensure plug-play operations
- Supported operating systems: Windows 7/8.1/10/11, Mac, & Linux OS
- Compatible with most 3rd party software such as OBS Studio and AMCap
- USB 3.1 Gen 1 (RGB/YUY2/NV12/P010) 4 (capture up to 4K2K@30) and USB 2.0 (YUY2/NV12) (capture up to 1080@15)
- Low Latency (3~4ms at 1080P)

Note: Please use the included USB 3.0 cable in the box to protect the device and avoid further compatible issues. Video resolution changes may require users to restart software. Does NOT support HDR10 plus, HLG, and Dolby Vision to SDR conversion

Packing List

- 1x BG-4K120CHA
- 1x 5V power adapter
- 1x USB 3.0 A to C Cable (host to device)
- 1x User Manual

Specifications

Model I	Name	BG-4K120CHA					
Technical							
Role of usage		Video Capture Device					
Input Video bandwidth		Up to FRL 5 (40G)					
Output bandwidth(JSB-C)	Up to 5 Gbps (USB-C)					
Output bandwidth(HDMI)	Up to FRL 5 (40G)					
Video support(USB	-C)	Up to 4K2K@30/1080P@120					
Video support(HDM	11)	Up to 4K2K 120Hz 4:4:4/4:2:2/4:2:0					
Audio Input		HDMI Embedded Audio & Stereo audio Input					
Audio Support		HDMI output up to 7.1ch, TOSLINK up to 5.1ch, Stereo audio up to 2ch					
Recording Mode		Software Compression					
Recording Video Fo	ormat	RGB/YUY2/NV12/P010 (USB3.1 Gen 1), YUY2/NV12 (USB2.0)					
ESD protection		Human body model — ±15kV [air-gap discharge] & ±8kV [contact discharge]					
PCB stack-up		4-layer board [impedance control – differential 100 Ω ; single 50 Ω]					
Firmware update		Feasible via USB-C Port					
Input		1x HDMI+ 1x 3.5mm					
Output		1x USB-C + 1x HDMI + 1x 3.5mm + 1x TOSLINK					
HDMI connector		Type A [19-pin female]					
USB connector		USB 3.1 Type-C (SuperSpeed USB)					
Software compatibion (not complete list)	ility	OBS Studio (Windows, Linux, MAC), AMCap (Windows), Potplayer (Windows), VLC (OS X, Linux), XSplit Broadcaster (Windows), Skype (Windows, OS X), Zoom (Windows), Hangout (Windows), TeamViewer (Windows)					
OS Support		Windows 7 /8.1 /10/11, Mac and Linux OS					
Mechanical							
Housing		Metal enclosure					
	Model	177 x 81 x 22mm [7" x 3.2" x 0.9"]					
Dimensions [L x W x H]	Package	198 x 137 x 74mm [7.8" x 5.4" x 2.9"]					
	Carton	420 x 400 x 300mm [1'4"x 1'3" x 11.8"]					
M/stabl	Model	165g[5.8 oz]					
Weight	Package	445g[1 lbs]					
Power supply		Via USB-C					
Power consumption	า	4.5 Watts [max]					
Operation temperat	ure	0~40°C [32~104°F]					
Storage temperatur	e	-20~60°C [-4~140°F]					
Relative humidity		20~90% RH [no condensation]					

Operation Controls and Functions

Front and Rear Panel

No.	Name	Function Description
1	STEREO AUDIO IN	Audio extracts from HDMI input
2	STEREO AUDIO OUT	Connect to an analog stereo audio source
3	S/PDIF OUT	Audio extracts from HDMI input
4	RESET BUTTON	Reset the device
5	LED INDICATOR	USB-C indicator LED [Red] The device is connected to the USB 2.0 port on the host [Blue] The device is connected to the USB 3.0 port on the host
6	LED INDICATOR	Power & input signal indicator LED [Blue] Device powered on (no input signal) [Green] Input detects HDMI signal [Red] Input source is HDCP protected
7	STEREO AUDIO IN VOLUME KNOB	To adjust the stereo audio in sound level
8	STEREO AUDIO OUT VOLUME KNOB	To adjust the stereo audio out sound level
9	POWER JACK	Connect to the +5V DC power supply unit
10	USB-C OUT	Connect to a USB host (PC, NB, MAC)
11	HDMI OUT	Connect to a HDMI display
12	HDMI IN	Connect to a HDMI source

- 1. When the input source is HDCP protected, LED will become red to indicate the content is legally encrypted and can NOT be captured.
- If you plug the capture device into the USB 3.0 port on the host, but the LED indicator lights up red, it means that the device is working according to the USB 2.0 specification. There could be an issue with the USB cable or USB Port.

Play on 4K120 TV with HDR while Capture at 1080p

Video Streaming

Create a Video Streaming

Users can create video streams on their streaming service platform. The steps below show how to complete video streaming settings from Twitch and YouTube.

Twitch

1. Browse to the Twitch website (<u>https://www.twitch.tv/</u>) and log in. Next, select "Creator Dashboard" from your account drop-down menu at the top right of the screen.

Log in to Twitch		. <mark></mark>	🗘 📮 💠 Get Bits 🙎

Stream and record videos with OBS

OBS is a popular USB capture freeware and has excellent compatibility. Please start with OBS if users are not familiar with USB capture devices.

Download the software

Browse to the download page of the OBS official website (https://obsproject.com/download), then select the suitable computer operating system and start downloading.

Start the software control program

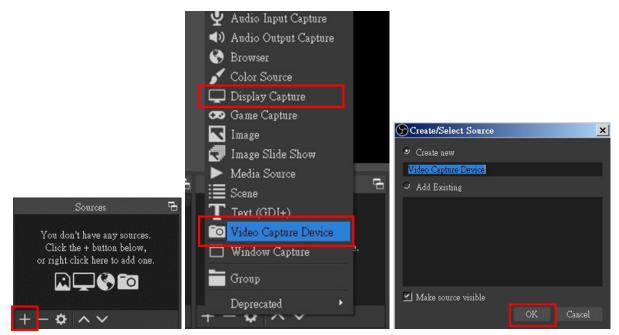

After downloading the software, please open it and follow the below steps to complete the video streaming settings.

File Edit	View Profile	Scene Collecti	on Tools Help						
		e		5	Audio Mixer	6	Scene Transitions	ę	Controls 7
Scene 1						0.0 dB			Start Streaming
			You don't have any sources. Click the + button below,			» 🗘	+		Start Recording
			or right click here to add one.			0.0 dB	Duration 300 ms	\$	Stadio Mode

+ - ^	~		OK	Cancel	

2. Find the **"Source"** window, click **"+"** in the lower left corner, and then select **"Display Capture"** or **"Video Capture Device"** to create a new source.

Next, you can set display capture properties. If you select "Display Capture" in step 2, you can select the primary monitor or other extended monitor as the display source. If you select "Video Capture Device" in step 2, you can select a USB video device as the display source. After all settings are completed, click "OK".

The procedures the manual demonstrates are based on the interface that each website provides at the time when the manual is written. Please note that the above procedures are subject to change due to platform updates.

Troubleshooting

Our USB device has done comprehensive tests before shipment. Most of the incompatibilities we have experienced are not from the USB capture device itself, but from the sophisticated software and hardware combination of PC or laptop. Please follow the following suggestions to see any help.

- 1. OBS is a popular USB capture freeware and has excellent compatibility. Please download it and start with OBS if users are not familiar with USB capture devices. https://obsproject.com/download
- 2. Due to the complexities of OS and computer hardware, different USB ports on PC or laptop may have different performance or limitations. Please try all USB ports to see if there are any differences.
- 3. Please use the USB cable in the box. We do not guarantee the overall performance when the USB capture box works with some other USB cables.
- HDMI/SDI cable quality may also play an essential role when capturing. Please be sure that HDMI/SDI cable can do 4K2K@60 HDMI/SDI signal transmission or better. Try different cables when the device is not able to work as expected.
- If audio has noise when using the PotPlayer software, please adjust the audio renderer to WaveOut on the software. The setting path is: PotPlayer→ Audio → Audio Output → Audio Renderer → WaveOut
- 6. If there are problems such as video flipping or wrong direction when using VLC software, please rotate, flip or transpose the video in the VLC software to correct the video. The setting path is:

 $\mathsf{Tool} \to \mathsf{Effects} \And \mathsf{Filters} \to \mathsf{Video} \ \mathsf{Effects} \to \mathsf{Geometry} \to \mathsf{Transform}$
