BZBGEAR SDI Siamese cables are made using 75 ohm shielded coaxial cable with high-quality BNC connectors. The addition of a 2-conductor 18-gauge stranded copper wire allows power or serial control to be carried with the video signal on a single wire run. They are designed to reliably support 3G-SDI cameras and equipment at resolutions up to 1080P over distances up to 100m. The cables feature a woven shield to help reject electromagnetic interference and deliver pristine images free from artifacts. They are suitable for both temporary and permanent applications requiring a high-quality SDI connection.

**FEATURES**

- Reliable – Designed to handle years of abuse
- Siamese Wire – carries DC power or RS232/485 signal
- Long Distance – Transmit signals up to 100m
- Inexpensive – SDI cables cost a fraction of HDMI cables
- 1080P HD – Transmit signals up to 1080P60
- Tested – 3Ghz sweep tested to guarantee quality
