Statement

Please read these instructions carefully before connecting, operating, or configuring this product. Please save this manual for future reference.

Safety Precaution

- To prevent damaging this product, avoid heavy pressure, strong vibration, or immersion during transportation, storage, and installation.
- The housing of this product is made of organic materials. Do not expose to any liquid, gas, or solids which may corrode the shell.
- Do not expose the product to rain or moisture.
- The product has no power switch. Remove power immediately if the camera is not in proper working condition to avoid electrical shock.
- To prevent the risk of electric shock, do not open the case. Installation and maintenance should only be carried out by qualified technicians.
- Installation and use of this product must strictly comply with local electrical safety standards.
- The power supply of the product is $\pm 12V$, the max electrical current is 2A.
- Do not use the product beyond the specified temperature, humidity, or power supply specifications.
- This product does not contain parts that can be maintained or repaired by users. Damage caused by dismantling the product without authorization from BZBGear is not covered under the warranty policy.
- Installation and use of this product must strictly comply with local electrical safety standards.
- Do not turn the camera head manually. Doing so may result in mechanical damage. Camera should only be placed on a stable horizontal surface and cannot be installed at an angle.
- Make sure there are no obstacles within the camera's rotational range when installing. Never power on before installation has been completed.

Introduction

Go viral with the BG-PACKSHOT-C10X! This 1080p HD camera features fast, accurate near-field auto-focus, an integrated stereo microphone, and the ability to swap between landscape and portrait formats with the flip of a switch. Specifically designed for content creators, this camera makes it easy to create high-quality videos and streams with crisp audio and accurate color reproduction.

Ideal for up-close and personal shoots, the BG-PACKSHOT-C10X is a versatile solution for capturing videos and photos meant to be viewed on both traditional monitors as well as mobile devices. This makes it possible to record not only for wide format platforms like YouTube, but also for vertical-focused content like TikTok and YouTube Shorts.

Features

- **Full HD Resolution:** 1/2.8 inch high quality CMOS sensor. Resolution is up to 1920x1080 with frame rate up to 30fps.
- **Optical Zoom Lens:** 10X optical zoom lens and 68.8° wide angle lens.
- **Multiple Video Interfaces:** HDMI, USB3.0; Simultaneously output audio and video signal
- **Leading Auto Focus Technology:** Fast, accurate, and stable auto focusing technology.
- **Horizontal and Vertical Screen:** Allows the user to switch formats from landscape to portrait to optimize for mobile devices.
- **Built-in microphone:** Dual microphone array with a 6 meter omnidirectional pickup pattern (optimal pickup distance is 3 meters) and a noise suppression algorithm which enhances voice capture.
- **Multiple Audio/Video Compression Standards:** YUY2 / NV12 / MJPG / H.264 / H.265 video compression format.
- **Low Noise and High SNR:** High SNR image is achieved with low noise CMOS. Advanced 2D/3D noise reduction technology further reduces the noise while ensuring high image clarity.
- **Easy to use:** No need to download drivers, USB output is plug and play with a convenient user experience.

Interfaces and Connection

Remote Control

Match Code for Wireless Remote Control

One-to-One Code Matching:

Press the "set" and "*" keys combined for 3 seconds, LED indicator starts flashing. Camera will receive the signal and power on. The LED indicator will turn off if the code matching is successful. The camera can be controlled by the wireless remote control only after one to one code pairing.

If one-to-one code matching fails, the red LED light flashes for 20 seconds and then will go off. The camera will halt code matching and activate sleep mode; Hold the power for 3 seconds to wake the camera up and re-match code.

Note: Upon matching code successfully, please select the camera's address to control it.

Clear Code:

Press the "set" and "*" keys combined for 3 seconds, the LED indicator will start flashing. Camera will power off and on and the LED indicator will go off if the code clearing is successful.

Sleep Mode and Wake Up:

Press and hold the power button for 3 seconds to wake up the camera from sleep mode.

Keys Introduction for IR Remote Control

- In this manual, "press the key" means a click rather than a long-press, and a special note will be given if a long-press for more than one second is required.
- When a key-combination is required, do it in sequence. For example, [*]+[#]+[F1] means press "[]" first and then press "[]" and last press "[F1]".

1. Standby Key

The camera enters standby mode if the power button is pressed for 3 seconds. Press and hold power for 3 seconds to wake up the camera and it will perform the system self-check again and return to the HOME position (If preset (0) position is set, the camera will return to the preset (0) position).

2. Camera Selection

Select the camera's address to control it.

3. Focus Control

Auto: Auto focus mode

Manual: Manual focus mode

Focus + (near): Press【FOCUS +】key (Valid only in manual focus mode)

Focus - (far): Press【FOCUS -】key (Valid only in manual focus mode)

Press and hold the keys, focusing will continue and stop based on the key being pressed and released.

4. Zoom Control

ZOOM +: press【ZOOM +】key to zoom in

ZOOM -: press【ZOOM -】key to zoom out

Press and hold the keys, the action of zoom will continue until the key is released.

5. Set and Clear Presets

Set Preset: press【SET PRESET】button, and then press the number key 0-9 to set preset positions.

Note: 10 presets are available via the remote control.

Call Preset: Press a number key (0-9) to call a preset position.

Clear Preset: Press【CLEAR PRESET】and then press the number key 0-9 to clear the preset position.

Note: press the【#】key three times to clear all presets.

6. Menu Setting

【MENU】: Open / close the OSD menu

【HOME】: Camera lens back to the middle position;
Confirm button; Enter next menu

【↑】【↓】: Choose item

【←】【→】: Modify values

【BLC ON/OFF】: Turn on or off the back light compensation

Menu Introduction

Main menu

In normal working mode, press 【MENU】 key to display the menu, and use the up and down arrows to select a menu item.

- 1) **Language:** Move the pointer to (Language) in the main menu, and press the [←→] key to modify language.
- 2) **Image Style:** Move the pointer to (Image Style) in the main menu, and press the [←→] key to modify the style default / Beauty / Jewelry
- 3) **Anchor:** Move the pointer to (Anchor) in the main menu, and press the [←→] key to modify the 1-4 host numbers; Image parameters can be modified manually under different host numbers, and can be saved after power failure.
- 4) **Exposure Setting:** Move the pointer to (EXPOSURE) in the Main Menu, click【HOME】to enter the Exposure sub menu as shown below:

Mode: Auto, Manual, Shutter priority and Brightness priority.

EV: On/Off (only available in auto mode)

Compensation Level: -7~7 (only available in auto mode when EV is ON)

BLC: ON/OFF for options (only available in auto mode)

Dynamic Range: 1~8, close

Maintenance and Troubleshooting

4.1 Camera Maintenance

- 1) Power off the camera and disconnect the power adapter and socket if the unit is not used for an extended period of time.
- 2) Use soft cloth or tissue to clean the camera cover.
- 3) Wipe with a soft dry cloth when cleaning the camera lens. Wipe it gently with a mild detergent if needed. Do not use strong or corrosive detergents to avoid scratching the lens and affecting the video quality.

4.2 Troubleshooting

- 1) No video output
 - a. Check whether the device is connected to the USB cable and whether the power indicator is on
 - b. Check whether the device is in standby state, long press the power button for 3s to see whether it can be turned on
 - c. Restart the computer
 - d. Check the video output cable
 - e. Check whether the device is recognized, unplug the device and reconnect when it is displayed in the device manager
- 2) Remote control not working
 - a. Re-code the wireless remote control to the camera
 - b. Remote control address is set to 1 (if the machine is set back to the factory defaults, remote control addresses need to be back to 1 too)
 - c. Check whether the battery is installed on the remote controller or low
 - d. Check the camera working mode is the normal operating mode
